Revit, BIM Data Specialist:

Initially a part-time, virtual position providing Revit services. The successful candidate must be a self-starter and comfortable with tight deadlines. Strong Revit skills are required (a minimum of two years experience). The candidate must possess both an understanding and respect for maintaining BIM standards, templates and data structures within every project file.

Comfortable working as a virtual staff member with primary communication via net-meeting and conference calls. Experience with healthcare and institutional markets a big plus.

The successful candidates must possess and be willing to maintain and expand upon the following:
1- Strong BIM skillsets (measured on a 0-10 scale with 10 reflecting world class skills, a minimum of 7 is required)
2- Understanding of and capabilities of creating, maintaining, supporting data structure standards.
3- A motivated, strong, self starter with the ability to set and meet schedules
4- Strong understanding and ability (or willingness and ability to quickly learn) to not only input data into the BIM model to obtain standard AEC documents, but to increasingly create an organized big data warehouse. That provides member companies unique and rewarding understandings and predictive analysis capabilities throughout the building process and life cycle.
5- Strong, cloud collaborative and communication skills.
6- Hardware and software skillsets suitable to perform the required work.

The first interview will be a 15-20 minute introductory phone interview. If successful, the candidate will then receive via a cloud link, a folder with files to briefly review. A 2nd 45-60 minute discussion will then be scheduled where the candidate will be requested to comment on the file structure and various procedures that they would recommend in implementing various data inputs, processes or reports.

Please email your interest in taking part in the next phase of the review and provide the best days and times that you would typically be good for you to be available at a computer. Thank you for your consideration and we look forward to hearing from you in the immediate future……………
